PLC (Automatic)

Variators - Inverters

REMOTE ASSISTANCE

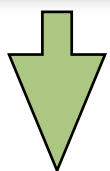

Rometa installations incorporate a Remote Assistance system to display, verify and modify parameters of PLC. (LENZE)

If the client has internet connection up to the machine, he can have a technician online from our office in Rometa, thanks to this system.

We can check problems, finding a solution. We can assist the client faster, reducing costs of assistance without trip.

We can also display and modify parameters of the speed variators of motors (Inverters)

Rometa offers you a technician online in your installation.
